

investigadores predoctorales en Investigaciones Biomédicas de Aragón

Welcome to the ipIBA seminar series 2023/2024

Short informal talks given by **predoctoral researches of Aragón** with the aim to promote 2 main goals:

1. **Networking** between predoctoral and postdoctoral researchers in Aragón.
2. Improve our **communicative skills**.

“Copper release modulation in Copper-Based Nanoparticles for Cancer Therapy in 3D Microfluidic-Based Cell Culture Model”

Tuesday, February 13, 2024
From 9:30 to 10:30

Summary:

Study on the influence of NPs and copper ions on the development and proliferation of tumors.

Speaker: Jose Ignacio Garcia Peiro (joseignacio.garcia.peiro@gmail.com)

Doctoral Programme: Chemical Engineering and Environmental Technologies

Affiliation: NFP group, INMA

Principal Investigator: Dr. Jesús Santamaria

Organizes: Institute for Health Research Aragón
