

investigadores predoctorales en Investigaciones Biomédicas de Aragón

**Welcome to the ipIBA seminar series 2023/2024**

Short informal talks given by **predoctoral researches of Aragón** with the aim to promote 2 main goals:

1. **Networking** between predoctoral and postdoctoral researchers in Aragón.
2. Improve our **communicative skills**.

## “Assessing the optimal device for treating bleeding in extremities.”

**Tuesday, November 7<sup>th</sup> 2023**  
**From 9:30 to 10:30**

### Summary:

Compressible extremity hemorrhage is a significant cause of preventable death in trauma cases. The self-application of extremity tourniquets is a life-saving intervention that can be applied in the field or at the site of injury. Our study aims to evaluate the best commercially available device for this element an education program both purpose and imp locally and regionally.

**Speaker:** Carlos Yanez, MD, FACS (carlosyb1@gmail.com)

**Doctoral Programme:** Medicine, University of Zaragoza

**Affiliation:** Grupo de Experimentación Quirúrgica, Clínica y Experimental (GIIS)

**Principal Investigator:** Dr. Antonio Güemes

**Organizes:** Institute for Health Research Aragón
